Ticket Report

Date:

Be prepared for your next SOC 2 audit

resolve

Posted by: Admin

Created at: July 18, 2024, 3:38 p.m.

Now that you have a better understanding of what to expect from a SOC 2 audit report, you should feel prepared to deal with your next audit. Remember, early preparation of section 3 will help things go a lot smoother. Keep the information in that section updated so it accurately reflects your company's current state. Don't wait until the last minute before an audit begins!

this is from superuser , it should not send email

testing height

resolved

Posted by: Sudeep Bogati

Created at: July 19, 2024, 12:02 p.m.

To ensure that the "See in Detail" and "Mark as Resolved" buttons are always visible at the bottom of the card, you can use flexbox to structure the card layout. Here, we'll make sure the card's height is fixed, and if the content is too long, it will scroll while the buttons remain fixed at the bottom.

Just a script tag.

Potential Data Breach Identified on Dark Web Marketplace resolved

Posted by: Admin

Created at: July 21, 2024, 10:26 a.m.

A potential data breach has been identified on a well-known dark web marketplace. Sensitive information including usernames, email addresses, and hashed passwords of our users has been found. Immediate investigation and mitigation are required to prevent further damage.

To achieve the effect of truncating text with an ellipsis when it exceeds a maximum height, you can use the line-clamp utility from Tailwind CSS. This utility allows you to specify the maximum number of lines to display, and it will automatically add an ellipsis if the text exceeds this limit. First, ensure you have the line-clamp plugin enabled in your Tailwind CSS configuration. If you haven't already added it, you can do so by installing the plugin and adding it to your tailwind.config.js:
